### **Palestinians face the crimes of Israeli occupation**

In the past year, Israeli government forces have further intensified their provocations and attacks against Al-Aqsa Mosque Compound by allowing Israeli extremist settlers free reign to storm the holy site in order to change its status quo.

The alarming excessive use of force is the outcome of the Israeli government's decision in September to allow its occupying forces the use of lethal weapons, with live ammunition against civilians.

**This report summarizes some of the aggression Palestinians have endured at the hands of Israeli forces and settlers just over the past month (September 13th and October 13th 2015).**

Hadeel Al Hashlamon, 18 years old, shot dead by Israeli occupation forces at a military checkpoint "Container" - Hebron on 09/22/2015.

Hadeel was shot in cold blood and was left to bleed for more than half an hour before being transported to the hospital by ambulance where she died.
